DETAILED ACTION

*Response to Amendment*

RECEIVED  
JAN 30 2002  
TC 1700

1. In response to the Amendment received on August 29, 2001, the examiner has carefully considered the amendments. The examiner acknowledges the cancellation of claims 1-7.

*Claim Rejections - 35 USC § 102*

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

3. Claims 15-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Suzuki et al (5,573,831).

The text section of the rejection can be found in a prior office action.

*Claim Rejections - 35 USC § 103*

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 15-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Suzuki et al (5,573,831).

Suzuki et al is described in the above rejection. Suzuki et al does not expressly disclose "animal protein" as the organic filler. However, Suzuki et al teaches the use of just protein as

an organic filler, wherein it is taught that the protein is composed of natural materials--column 7, lines 36-38. The examiner contends natural material can be broken-down into two categories--plant and animal. Therefore, it would have been obvious for one of ordinary skill in the art to select an animal protein as the organic filler in the compositions as taught by Suzuki. The motivation would have been to obtain compositions with superior water resistance or oil resistance with the expectation of adequate success in the absence of evidence to the contrary.

### *Response to Arguments*

6. Applicant's arguments filed August 29, 2001 have been fully considered the arguments with regards to claims 8-14 are persuasive, however the arguments with respect to claims 15-21 are not persuasive. With regards to claims 15-21, applicant appears to be relying on the limitation of "animal protein" to distinguish over the art made of record. Suzuki et al teaches the use of protein as the organic filler, wherein it is taught the protein or cellulose fillers are composed of natural materials--see column 7, lines. The examiner contends that Suzuki et al anticipates animal protein because natural (organic) proteins can come from mainly two sources plant and animal, thus envisioned by the reference.

### *Allowable Subject Matter*

7. Claims 8-14 are allowed.

8. The following is an examiner's statement of reasons for allowance: the prior art fails to teach a composition for coating that consist essentially of a radiation curable compound containing a mono-functional (meth) acrylic monomer and a multifunctional (more than bi-functional) acrylic monomer; and a

water absorbing organic filler and a water-absorbing inorganic filler as components.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### *Conclusion*

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
